

This little project was simply to construct a bedroom and separate shower room in a grenier attached to our clients main property. The main objective was to give their eldest son his own space and he was thrilled with the end result. As with all these types of projects, the uneven floors, walls and roof timbers made for the usual trials and tribulations but the end result makes it worth the trouble. The images will show you how we construct our partitions and I can assure you that they are both sturdy and robust. The insulation is 17 composite "isolants réfléchif" and makes for a well insulated and cozy room. Slightly more expensive than the normal fibreglass and Rockwool, it is much more effective both in the cold of winter and the heat of the summer. A sound investment.
